

Suspicious Patterns Identification & Analysis - TGI

Use Case Notes

[UC30-01] - Awesense Energy Transition Platform Use Case

Overview

This manual is intended to:

- Provide instructions to create the selected use case in TGI.

For more details about grid and time series visualization and how it can be analyzed using Awesense's Platform, please refer to the [UC30-01 - Suspicious Patterns Identification & Analysis.pdf](#) document.

Manual and TGI screenshots

This document shows the implementation process of mentioned use case in the TGI visualization interface along with a description of how to create such a use case on your data.

The tool for finding suspicious patterns can be found under Investigations in the main menu (select from the main menu - top hamburger icon).

Next, you need to select the investigation we are interested in from the table.

The screenshot displays the True Grid Intelligence (TGI) web application. The top navigation bar includes the "True Grid Intelligence" logo, a hamburger menu icon, and the "Investigations" tab. A search bar is located on the right. The main content area is divided into two sections: a left sidebar with a "New Chart" button and a message "You haven't created any charts yet. Click the button above to get started.", and a right section featuring a map of the United States and a table of investigations.

The "Investigations" table lists 7 investigations. The first three rows are highlighted with red borders:

Investigation	Type	Case	Consumers	Total Δ/day	Total Δ %	Owner	Start
Investigation of 39660	Exploratory		66			awesense-petr	1 Jun, 2023
Investigation of L7-124509	Exploratory		222			awesense-petr	1 Jun, 2023
Investigation of L22-46498	Exploratory		340			awesense-petr	1 Jun, 2023

The investigation instance will be opened on the next screen.

Use Case Notes

[UC30-01] - Awesense Energy Transition Platform Use Case

There is a "Consumer Breakdown" button in the left sidebar.

The screenshot displays the True Grid Intelligence (TGI) web application interface. The top navigation bar includes the TGI logo, the text "True Grid Intelligence", a hamburger menu icon, the breadcrumb "Investigations » Investigation of 39660", and a "Map" button. The main content area is split into a left sidebar and a right map panel. The sidebar contains the title "Investigation of 39660" with a "No Case" link and a "Read only" checkbox. Below this are fields for "Circuit" (North Central Zone), "GIS Date" (1 Jan, 2021 9:00 PM), "Owner" (awesense-petr), "Starts" (1 Jun, 2023 5:23 PM), and "Description" (No Description). A "Target Area" section includes tabs for "Transformers", "Meters", "Consumers", and "Producers (DERs)". A table shows data for "Transformers" with columns for "Count" and "kVA", and a "Consumer Breakdown" button is highlighted with a red box. The right panel shows a map of a region with a red-shaded area labeled "Boundary #01" and various road labels like "CR 140", "C-6", "C-5", "CR 9", "SR 522", and "CR 41". A scale bar at the bottom indicates "1 km" and "1 mi".

Use Case Notes

[UC30-01] - Awesense Energy Transition Platform Use Case

Here you must select the "Past Year Usage" tab.

Here you can see the consumption for each consumption point - "Usage (for Investigation Period and Last 12 months)" and also "Difference from Average". These values will help you to identify suspicious consumption points within your investigated segment (grid area).

General Note

This description was created for TGI version 3.10.0. For future versions of TGI, the process might be slightly different. Please contact tools@awesense.com for more information.
