

Analysis for Maximizing Value of IoT and Meter Devices

[UC25-01] - Awesense Energy Transition Platform Use Case

Overview

This manual is intended to:

- Provide instructions to create the selected Use case in True Grid Intelligence (TGI).

For more details about Analysis for Maximizing Value of IoT and Meter Devices and how it can be analyzed using Awesense's Energy Transition Platform, please refer to the [UC25-01 - Analysis for Maximizing Value of IoT and Meter Devices.pdf](#) document.

TGI Use Case Notes

This document shows the implementation process of mentioned use case in the TGI visualization interface along with a description of how to create such a use case on your data.

The tool for finding suspicious consumption patterns can be found under Investigations in the main menu (select from the main menu - top hamburger icon).

Next, you need to select the investigation we are interested in from the table.

The screenshot shows the True Grid Intelligence (TGI) interface. The top navigation bar includes the TGI logo, a hamburger menu icon, and the 'Investigations' tab. A search bar is also present. Below the navigation bar, there is a 'New Chart' button and a message: 'You haven't created any charts yet. Click the button above to get started.' The main area features a map of the United States with various cities and states labeled. Below the map, there is a table titled 'Investigations' with 7 investigations listed. The table has columns for Investigation, Type, Case, Consumers, Total Δ/day, Total Δ %, Owner, and Start. The first three rows are highlighted with a red border.

Investigation	Type	Case	Consumers	Total Δ/day	Total Δ %	Owner	Start
Investigation of 39660	Exploratory		66			awesense-petr	1 Jun, 2023
Investigation of L7-124509	Exploratory		222			awesense-petr	1 Jun, 2023
Investigation of L22-46498	Exploratory		340			awesense-petr	1 Jun, 2023

The investigation instance will be opened on the next screen.

[UC25-01] - Awesense Energy Transition Platform Use Case

There is a "Consumer Breakdown" button in the left sidebar.

The screenshot shows the 'True Grid Intelligence' web application interface for an 'Investigation of 39660'. The left sidebar contains a 'No Case' link, a 'Read only' checkbox, and a metadata section with fields for Circuit (North Central Zone), GIS Date (1 Jan, 2021 9:00 PM), Owner (awesense-petr), Starts (1 Jun, 2023 5:23 PM), and Description (No Description). Below this is a 'Target Area' section with tabs for Transformers, Meters, Consumers, and Producers (DERs). The 'Transformers' tab is active, showing a table with columns for Count and kVA, and a 'Consumer Breakdown' button highlighted with a red box. The main map area displays a red-shaded region with a dashed black line labeled 'Boundary #01'. The map includes labels for roads (SR 140, C-6, C-5, CR 9, SR 522, CR 41) and a scale bar (1 km, 1 mi).

Analysis for Maximizing Value of IoT and Meter Devices

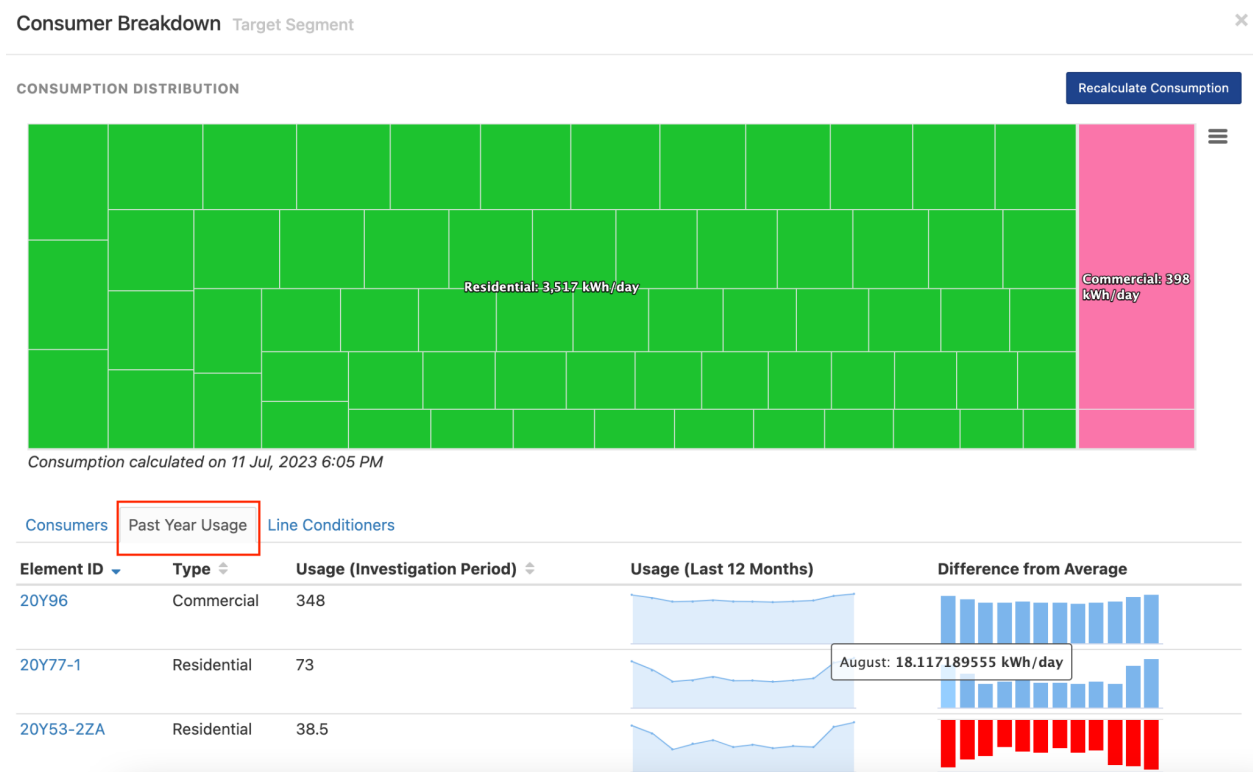

[UC25-01] - Awesense Energy Transition Platform Use Case

If you click Residential or Commercial, the consumption for each point of use will be displayed.

You can also find more information on the "Past Year Usage" tab.

Here you can see the consumption for each consumption point - "Usage (for Investigation Period and Last 12 months)".

Analysis for Maximizing Value of IoT and Meter Devices

[UC25-01] - Awesense Energy Transition Platform Use Case

With this feature, a suspicious consumption in the analyzed segment can be spotted and next best action can be taken.

General Note

- This description was created for TGI version 3.10.0. For future versions of TGI, the process might be slightly different.
- Access to the different parts of TGI varies depending on the permissions of the user.
- Users on the Sandbox environments currently have read-only permissions, therefore, this use case may be accessible only for viewing, not creation or editing. If you are interested in the latter, please contact Awesense.
- Some of the data for this use case may be available only on Sandbox tiers 2 & 3, but not on tier 1. If you are interested in upgrading your tier access, please contact Awesense.
- For more information please contact tools@awesense.com.
