Map view showing a green shaded area labeled "Boundary #01" and yellow labels "SR 684" and "SR 143".

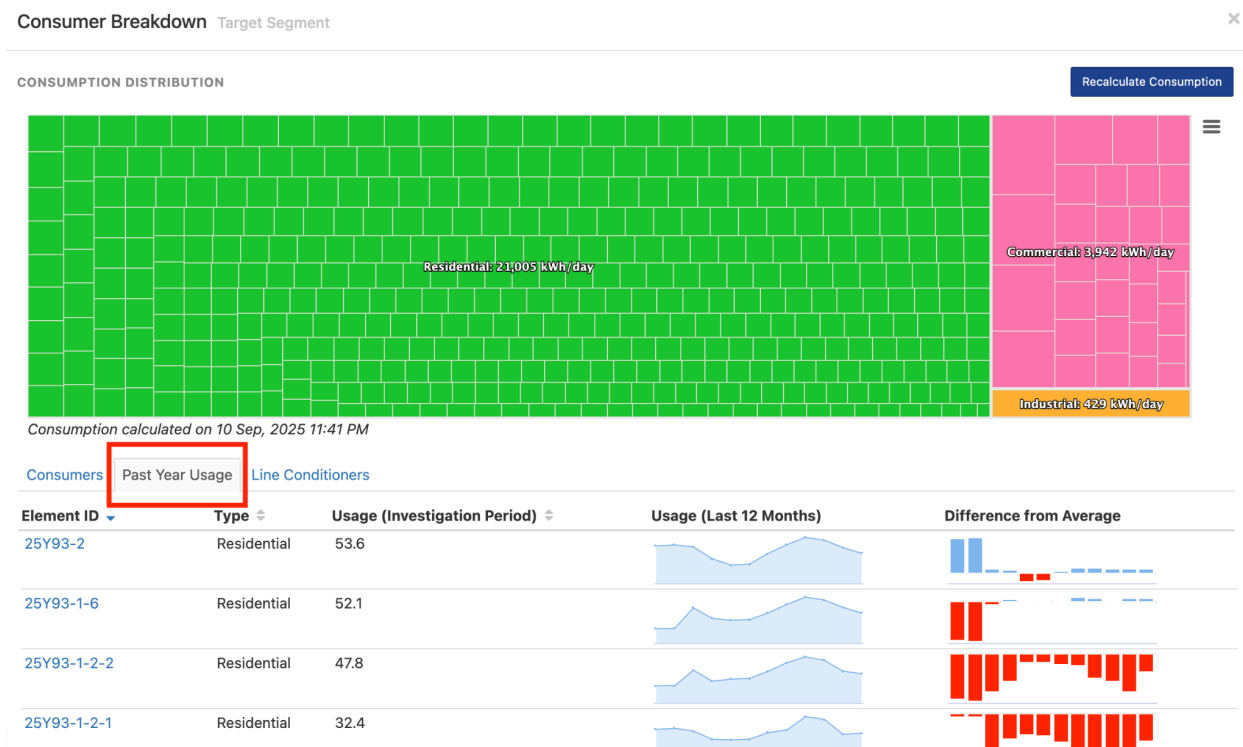

Suspicious Pattern Identification and Analysis - TGI

Use Case Notes

[UC30] - Awesense Platform Use Case

Here, you must select the "Past Year Usage" tab.

Here you can see the consumption for each consumption point - "Usage (for Investigation Period and Last 12 months)" and also "Difference from Average". These values will help you to identify suspicious consumption points within your investigated segment (grid area).

General Note

- This description was created for TGI version 3.10.0. For future versions of TGI, the process might be slightly different.
- Access to the different parts of TGI varies depending on the permissions of the user.
- Users on the Sandbox environments currently have read-only permissions, therefore, this use case may be accessible only for viewing, not creation or editing. If you are interested in the latter, please contact Awesense.
- Some of the data for this use case may be available only on Sandbox tiers 2 & 3, but not on tier 1. If you are interested in upgrading your tier access, please contact Awesense.
- For more information, please contact tools@awesense.com.
